SAMPLE - not a real election

Ballot-box count and reconciliation

SampleData Managing Committee Election 2026-28. The box of every voting point was sealed when the Host closed the voting, and counted only after the seal was checked.

For the paper and online combination, each ballot cast on the mobile is printed and put in the ballot box. When voting is closed, the number of online ballots is matched against the printed copies in the box. A difference is shown here and must be explained before the result is declared.

Point	Post	Online ballots cast	Printed copies in box	Copies missing	Stray copies	Spoilt	Reconciled
1	President	9	9	0	0	0	Yes
2	Secretary	9	9	0	0	0	Yes
