Ballot-box count and reconciliation

SampleData Annual General Meeting 2026. The box of every voting point was sealed when the Host closed the voting, and counted only after the seal was checked.

For the paper and online combination, each ballot cast on the mobile is printed and put in the ballot box. When voting is closed, the number of online ballots is matched against the printed copies in the box. A difference is shown here and must be explained before the result is declared.

Point	Agenda point	Online ballots cast	Printed copies in box	Copies missing	Stray copies	Spoilt	Reconciled
2	Adoption of the audited accounts for 2025-26	9	9	0	0	0	Yes
